

POSITION POSTING

System Technician

Available: 1 Position in the Socorro Area

About us:

The Socorro Electric Cooperative, Inc. is a trusted and community-focused rural electric cooperative, committed to providing safe, reliable, and affordable power to our members. We take pride in our close-knit team and our dedication to making a positive impact in the communities we serve. As we continue to grow and enhance our operations, we are seeking a talented and motivated **System Technician** to join our team.

Position Overview: The Engineer Technician will support our engineering team in the design, maintenance, and troubleshooting of electrical infrastructure and equipment within the cooperative's service area. This is a dynamic and hands-on role, involving both fieldwork and office tasks to ensure the efficient and safe operation of our electrical systems

Key Responsibilities:

- **System Design and Support:** Assist with the design, testing, and implementation of electrical systems, ensuring compliance with safety regulations, industry standards, and cooperative guidelines.
- **Equipment Maintenance:** Conduct regular maintenance and troubleshooting on electrical equipment such as transformers, circuits, meters, and other distribution and substation components.
- **Field Inspections:** Perform field inspections to assess system performance, detect issues, and support necessary repairs or upgrades.
- **Technical Support:** Provide technical support for the installation and commissioning of new electrical distribution system equipment, ensuring proper setup and functionality.
- **Data Analysis:** Analyze system data, identify potential problems, and propose solutions to enhance system efficiency and reduce outages.
- **Safety Compliance:** Ensure that all work is performed in compliance with safety standards, both on-site and in the office, maintaining a culture of safety and quality.
- **Collaboration:** Work closely with other engineers, technicians, and team members to solve complex problems and improve system performance.
- **Documentation:** Maintain accurate records of inspections, repairs, and upgrades, ensuring that all documentation meets cooperative and regulatory standards.

Qualifications:

- **Education:** Associate's degree in Electric Power Technology, or a related field, Journeyman Meterman/Substation/Apparatus certificate is a plus, or equivalent combination of education and experience.
- **Experience:** Minimum of 2-3 years of hands-on experience in an electrical distribution or utility setting. Experience with rural cooperatives is a plus.
- **Technical Skills:** Strong knowledge of electrical systems and equipment, distribution networks, and electrical safety protocols.
- **Soft Skills:** Strong problem-solving abilities, attention to detail, and excellent communication skills. Ability to work both independently and as part of a team.
- **Benefits:**
 - Health, dental, and vision insurance.
 - Retirement plan with employer contributions.
 - Paid time off (PTO) and holidays.
 - Opportunities for professional development and career advancement.
 - A supportive and inclusive work environment where safety and teamwork are top priorities.

JOB WILL REMAIN OPEN UNTIL FILLED
